

ST. HOHN BOSCO SCHOOL, YACHULI

SCHOOL DISASTER MANAGEMENT COMMITTEE

Disaster Management can be described as the organized effort to efficiently allocate resources and distribute responsibilities for addressing the various humanitarian aspects of emergencies. This encompasses preparedness, response, and recovery measures, all with the overarching goal of minimizing the adverse effects of disasters. The Disaster Management Committee assumes the critical role of coordinating, contacting, and communicating to effectively respond to emergencies as they arise.

- To identify and manage hazards in the school,
- Prepare and respond to emergencies in school,
- To mitigate the effect of disasters on the school.

The primary objectives of the school's Disaster Management Committee are as follows:

The Preparedness: To proactively identify potential risks and hazards within the school environment, and to develop comprehensive plans and strategies to mitigate these risks. This includes training staff and students on emergency protocols and conducting drills to ensure readiness.

Response: To establish a swift and organized response mechanism in the event of an emergency, ensuring that all necessary actions are taken promptly to safeguard the well-being of students, staff, and the school community. This may involve activating evacuation procedures, providing first aid, and liaising with external agencies if necessary.

Communication: To establish effective communication channels within the school community and with external stakeholders. This involves keeping everyone informed about emergency plans, updates, and actions taken during an emergency, and ensuring that contact information is up to date.

Training & Education: To regularly educate and train members of the school community about disaster preparedness, response procedures, and personal safety measures. This includes conducting workshops, distributing educational materials, and fostering a culture of safety and resilience.

Collaboration: To work closely with local authorities, emergency services, and relevant organizations to strengthen the school's disaster management capabilities. Collaborative efforts can lead to improved resources, knowledge sharing, and a more effective response during emergencies.

Continuous Improvement: To review and update disaster management plans and procedures on a regular basis, incorporating lessons learned from previous incidents and adapting to evolving risks and challenges.

In summary, the school's Disaster Management Committee is committed to safeguarding the well-being of the school community through comprehensive disaster preparedness, response, and recovery efforts. By adhering to these objectives, the committee aims to create a safer and more resilient school environment for all.
